Ageing and Blending
ROSE QUESNEL
Native Canadian Tobacco

Inspecting the Stock.

We have seen in our previous advertisements that, from the selection and first planting of the seed to the ultimate packing of the cured plant, it is a constant solicitude to the planter.

The tobacco, packed in bundles arrives at our warehouses where the stock is inspected, and, if the leaf appears to be well cured and of good quality it is "passed". Then the "hands" are packed upon each other in regular rows in large casks where they are compressed in a very solid mass and the casks stored in our cellars where the tobacco ages for two years. It is the slow, sure way of perfectly maturing tobacco in wooden casks which gives it that mellowed smoothness you taste in every pipeful of Rose Quesnel.

When perfectly aged the Quesnel Tobacco and Rose Tobacco, the two most fragrant and aromatic varieties of tobacco grown in Canada are blended by experts, in scientific proportions, the result of years of research and experiment, and, it is then ready to be cut and packed for the trade.

ROSE QUESNEL
Smoking Tobacco
MILD AND NATURAL

is an ideal blend of native pipe tobaccos. You cannot get greater tobacco satisfaction than ROSE QUESNEL will give you; it is free from sting or bite, does not dry or parch the mouth and it is cool, sweet, mild and fragrant.

Try a package
5¢
At all dealers.

ROSE QUESNEL Tobacco is the product of the choicest natural native leaf, properly grown, dried and cured and guaranteed free from artificial flavoring and "liquoring."
It is all tobacco and nothing but tobacco.

MILITARY CROSS IS AWARDED TO LT. MATHEWSON

McGill Graduate's Services are Recognized at Front

PTE. FERGUSON MISSING.

Pte. J. W. Mills, Arts '17, and Pte. P. A. Bieler, Arts '18, Are Wounded.

For gallant and distinguished conduct in the field, Captain Samuel J. Mathewson, Sci. '15, has been awarded the Military Cross and promoted to a captaincy, according to a cable message received by the young soldier's father, S. J. Mathewson, Ste. Famille street. In addition, a brother, Lieut. J. Arthur Mathewson, Law '15, has been promoted to a captaincy for his good work in the recent operations on the Somme front. Both are with the 42nd Battalion, in which there are a number of other McGill graduates and students, and both have been wounded in the recent fighting. A third brother, Lieut. Kenneth Mathewson, Arts '17, of the Royal Flying Corps, has been missing since August 3, when he was shot down in a fight with a Fokker. Enquiries have been made concerning Lieut. Kenneth Mathewson through the American diplomatic service, but without revealing any trace of his whereabouts.

The three Mathewson brothers, at that time officers in the 5th Royal Highlanders of Canada, enlisted in the commissioned ranks of the 42nd Battalion, when that corps was formed by the 5th R.H.C. in the summer of 1915. Capt. Sam Mathewson has seen considerable service with the 42nd, and in the attack on Courcelette, was slightly wounded by a bullet which grazed his face. He, however, refused to leave his unit. Capt. J. Arthur Mathewson, who was president of the Students' Council in 1914-15, was wounded during the battle of the Somme on September 15, being hit in the back by shrapnel. He is at present in London on furlough.

Pte. John W. Mills.

Pte. John W. Mills, Arts '17 and later of Arts '18, has been admitted to the University College Hospital in London, suffering from shrapnel wounds in the chest. Pte. Mills, whose home is in Ormstown, Que., enlisted here at the commencement of the session of 1915-16, with a Highland battalion then being formed here.

Pte. Richard M. Ferguson.

Pte. Richard Martin Ferguson, Arts '14, reported as missing since September 15, is the elder son of the Rev. Dr. J. T. Ferguson, Calgary, Alberta, superintendent of Home Missions of the Presbyterian Church. He was born in Cupar, Fifeshire, Scotland, on October 3, 1892, and there received the earlier part of his education. In 1904 he came to Canada with his parents, and continued his education at the public and high schools of Nelson, B.C., where he took the Governor-General's medals for proficiency three times.

After spending a year in farm work in Alberta and British Columbia, he came to McGill University, where he entered the Faculty of Arts. A brilliant student, he distinguished himself in mathematics and philosophy. During one of his vacations he worked as an assistant electrician in a manufacturing plant in Calgary. He was graduated in 1914, and after taking a Normal School course in Calgary, became a public school teacher at Anthill and Sunbeam in Alberta. In January, 1916, Pte. Ferguson enlisted in the 5th Universities Company, and left on overseas service in April. He was among the reinforcements sent to France early in June, after the third battle of Ypres.

At McGill Pte. Ferguson was actively connected with the Y.M.C.A.

Lieut. F. F. Archbald.

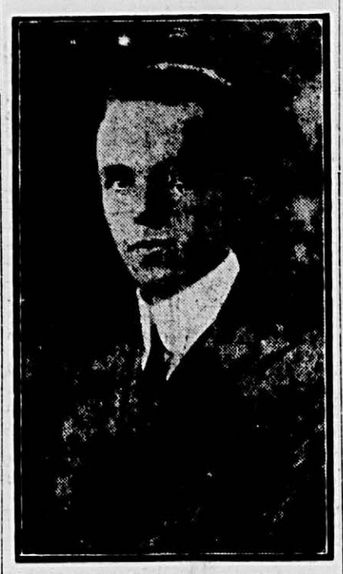
Word was received here yesterday that Lieut. F. F. Archbald, formerly of the McGill contingent, C.O.T.C., who was wounded on September 22, had succumbed to his injuries. Lieut. Archbald shortly after the war started, took up training to proceed overseas by taking a course in the McGill C.O.T.C. He went across with a Montreal battalion about a year ago. He had been in the trenches since the early part of June. Lieut. Archbald was a partner in the Stock Exchange house of Oswald Brothers. Mrs. Archbald has been in England for some time.

Pte. P. A. Bieler.

Pte. Philippe Alfred Bieler, Arts '18, one of four brothers serving with the Imperial fighting forces, is reported wounded in yesterday's morning list of casualties. Pte. Bieler is the son of Prof. Charles Bieler, of the Montreal Presbyterian College, and of Mrs. Bieler. He enlisted here in January last with the Fifth Universities Company, and went overseas with that unit before the University closed last session. He is 19 years of age, played class football last season, and served with the McGill Contingent, C.O.T.C. He also trained with the 3rd Battery, C.F.A. All the members of the family of Rev. Prof. and Mrs. Bieler, of military age, are in khaki, and three of them have now been wounded. The first to enlist was the eldest son, Jean, a student in the Faculty of Law, enlisted with No. 3 Canadian General

(Continued on Page 3.)

IN UNIVERSITY SPORTS.



ERIC A. CUSHING.

Eric Cushing is out to set up a new mark in the pole vault at the University Sports to-day, in which he will represent the Seniors. The little fellow has been training faithfully, and may be counted upon to make a good showing in the events in which he is entered. Cushing set up the McGill record of 10 ft. 3 ins., in the pole vault some years ago.

INTEREST WILL CENTRE ON THE ALL ROUND RACE

Three Former Champions all Have a Chance.

SMALL LIST OF ENTRIES.

Third Year Has Only One Man Entered For Any Event.

The entry list for the annual Sports of the University to be held this afternoon shows very few men entered, but the meet will be no less interesting on that account, as the names of three former all-round champions of the college are found on the list. Eric Cushing, who took the aggregate in 1914, gives promise of coming back this year in his specialties, the jumps and the sprints. Eric holds the distinction of being the only man in college this year who has a McGill championship to his credit. He took the pole vault in 1914, his best year, with a great jump of ten feet, eight inches, and came close to the high jump record. The next year, 1915, Dan Sutherland took his place as the result of the graduation of MacDougall leaving the way open for Danny to take all the weight events. In addition to his ability as a weight thrower, his efforts as a sprinter have won him many a point in University sports. While he has not made the records that MacDougall has, it was conceded in his first year that his sprinting made him a finer all-round man than the great "Mac." Danny was out of college last year, but if he has not gone back greatly since '15, he should rule as favorite in to-day's events. Incidentally, he is the only man to be entered from the third year, but with him alone ,the third year stands a chance of coming in better than last in the year competitions. The other champion, the present champion, in fact, is Don Smelzer, of the Senior year of medicine, and President of the Track Club. Don romped away with the high honors last year, after stiff competition. Don's work in individual events was not particularly bright, but his consistency in arriving in place gave him enough to give him the aggregate. His ability is such that he is liable to come in first in any of the events he enters, though this factor of uncertainty in him will be, as it has been before, the object of much interest, both by the spectators and the competitors themselves. It is very probable that the aggregate race this year, with such men entered, will be more intense in interest than any held in recent years.

As for the year title, the fourth year seems to have that pretty well sewed up, judging by past performances, a thing which is pretty apt to prove treacherous in ordinary cases, but the wonderful record of '17 in this branch of sports is far from ordinary in all respects. In the first place, '17 has won every meet that they have participated in since their arrival in these classic shades, and in no case were they pushed to come out in front. Likewise, the all-round championship has been sporting the breast of a '17 man since this wholly marvellous collection of world beaters took to the paths and pits in the misty bye-gone days of 1913. There is some possibility of this leaving their hands since Danny deserted them for the third year.

Several other men who are entered, while never having figured in the all-round race, are worthy of mention as stars, in their own particular line, of no mean magnitude. First of these is Hillier, who can be counted on to win the sprints ordinarily. Hillier has done the hundred in better time

INTERVENTION BY UNIVERSITY STOPS "SCRAP"

Sophomores Had 80 Prisoners in Disused House.

FRESHIES RELEASED

Necessary For University to Call Students' Council to Its Assistance

Intervention by the University authorities acting in conjunction with the Students' Council, yesterday, was responsible for the release of some eighty Freshmen who had been taken prisoners in various raids carried out by the Sophomores since an early hour in the morning, and who were being held in a house on University property in the vicinity of the Stadium to prevent their participation in the contemplated Freshman-Sophomore "scrap" to-day. Incidentally, after a conference of several hours' duration, it was agreed by the leaders of both Freshmen and Sophomores that the "scrap" be abandoned for the year.

Risregarding the recommendation made by the Students' Council that they avoid occupation of any of the houses on University property, the Sophomores yesterday morning, at an early hour, took possession of a disused residence near the Molson House, the scene of last year's encounter between the First and Second years, and to this place, Freshmen, roused from their sleep in various lodging-houses, and others who were captured while at their studies in the University buildings were taken. It appears that the Freshmen, who as a body hold the numerical superiority, had contemplated a coup upon the Sophomores following the drill of the C.O.T.C. last evening. Wind of this plan reached the Sophomores, and with a view to placing as many of the Freshmen as possible on a non-combatant basis during the "scrap," and also to make the "scrap" a more equally-sided affair, concerted efforts were made to gather together all available Freshmen. The fact that the Freshmen had also placed an order for 600 eggs of doubtful age for use in the contemplated "scrap" also became known to the Second year men. By representing that they were Freshmen and that they wished to change the address for delivery previously given by the First year men, a group of Sophomores effected the capture of the ammunition and its transfer to their headquarters.

The Sophomores commenced to put their plans into operation at six o'clock yesterday morning, when the men gathered according to Faculties, at meeting places previously decided upon. The Medicos took the west end of the city; the Science men the central portion of the city; and Arts the remainder. Taken by surprise, and in many cases while on their way to attend lectures, the Freshmen submitted with little opposition to being tied up by the Second year men. One husky Medical Freshman, however, made strenuous resistance when accosted in front of the new Medical Building, and it required ten Sophomores to tie him up. The various parties gathered in the rear of Strathcona Hall with their prisoners at seven o'clock, and marched to the Molson property a short time afterwards. For further punitive operations an ice waggon, driven by a resident of the east end of the city was commandeered. As the Freshmen were collected, their hands were tied and they were thrown in the ice waggon to be driven to Headquarters. It is said that High School students were stopped on their way to school and compelled to undergo a thorough examination before being permitted to proceed.

Various skirmishes between Freshmen and Sophomores took place during the morning, the most serious of which was a clash on the east campus, when twelve Freshmen who had been captured and tied up by Second year men were released on the intervention of officials.

While in the disused house, the Freshmen were well treated, and seemed reluctant to enjoy their experience. At 9:30 a.m. bread, tea and coffee were served the prisoners, who sat wrapped in blankets against the walls. Straw had been thrown about the floor and the Freshmen seemed quite contented.

Several attempts to escape were made by Freshmen, but in each case the uprisings were quelled by Sophomores backed up by eggs. On one occasion, when one Sophomore was left to guard a room full of Freshmen, the latter contrived unexpectedly to close the door ,and had the Soph. in their power when other Second year men began to bombard the room from outside, after they had captured a Freshman in Dentistry, who had freed himself and jumped from the window to the ground, a distance of from 15 to 20 feet. Throughout the Freshmen made no effort to organize to rescue their classmates.

Things began to move in official circles when it became known that the Sophomores had taken possession of the disused house, and were using it as a base for their operations, Freshmen being kept there tied with ropes, and their personal liberty otherwise being interfered with. F. B. Common, M.A., President of the Students' Council, was first appealed to by a student of the Freshman class in Arts, who had sought police protection after escaping from a body of Sopho-

YESTERDAY'S AFFAIR.

The creditable manner in which a rather critical situation was dealt with by every one concerned, directly or indirectly, in the affair between the first and second years yesterday, is worthy of more than passing comment. There can hardly be any doubt but that the Sophomores did wrong in occupying a University building in the face of the resolution of the Council and of the attitude taken by the Committee of Morals and Discipline last year. Outside of this no great objections can be urged against the proceedings—the prisoners, while rather closely confined and guarded, were treated as well as could be expected under the circumstances, and, in fact, the vast majority of them seemed to enjoy the novel experience they were forced to undergo; the victors caused no destruction of property, and only took what precautions anyone would deem reasonable to keep the vanquished in their power, and it must have been a sore blow to them to be required to release the Freshmen after the brilliant piece of strategy made use of in capturing them. However, the fact that they did release them is all the more to their credit, and goes to show that they were broad minded enough to realize that the greater good of the University should overrule any selfish ideas of personal satisfaction.

There is one rumor which seems to have taken a somewhat firm hold on the minds of a large number of the members of the first two years, to the effect that the Students' Council took it upon itself to act in the matter, and that the assertion of intervention by University authorities was nothing more or less than a fictitious statement This is absolutely false, and has not the vestige of truth in it. Let us see the exact position of the students concerned, the Students' Council and the University authorities.

Yesterday morning, Frank Common, President of the Council, received from the authorities at the college a statement to the effect that some Freshmen were detained in a University building by the Sophomores, and that the Students' Council was requested to consult with the second year men with the object of having the prisoners released, and that if this was not done they, the authorities, would take means of having them released,—means which would not reflect to the credit of McGill. This was the constitutional method of dealing with the matter. To quote from the constitution of the Students' Society (sec. 4, art. 5):

> The Executive Council shall be the only recognized medium between the Students and the University Authorities and the General Public.

Nothing could be clearer than this, and the Council was acting in its constituted capacity when taking the step it did. It was doing more than this. It was protecting, or at least doing all in its power to protect the student body from incurring the odium of the citizens of Montreal, which might have resulted had it not intervened. The Students' Council should be congratulated on the manner in which it dealt with the question, and the praiseworthy decision which was reached, although the real credit for the latter is due the Freshmen and Sophomores themselves.

EDITORIAL NOTES.

Men of the year '17 will be particularly interested in the Sports this afternoon, because if they win to-day's meet they will hold the distinction of having won every Annual Sports Meet held while at McGill. The Freshmen and Seniors' entries are almost numerically the same, and the contest will resolve itself into a struggle between these two classes, with the Seniors having the advantage of experience in former competitions. While indications at present are not very promising for the best of weather conditions, yet if it does not rain during the meet the past inclemency will have little effect on the event, as the track is so constructed as to be in good condition even after a heavy downpour. It is needless to say that every student in the University should be present, because it is the University holiday, and will also prove of general interest. It does seem a shame that more entries have not been received, and it is, to say the least, peculiar that the second and third year men cannot find both interest and time enough to participate. If the Seniors, with the amount of work which falls on their shoulders, can make a very creditable showing in the entry list, the only explanation for the absence of representatives from the Junior and Sophomore years is a combination of apathy and indolence.

An announcement of paramount importance to those who will be playing football this year is the result of the special meeting of the Athletic Association held yesterday, an account of which is printed in another column of the present issue. There was perhaps room for a false impression to be gained last year, when the judges appointed were not outsiders, not that their fairness was in the least questioned, but there are in every community people who love to hear themselves talk, and are only too glad to seize on what appears to be a possible opportunity to make trouble. The new arrangement leaves the recommendations, on which the "M's" are granted by the Athletic Association, entirely outside the control of any members of the student body. The regulation in regard to the number of games each man must play to be eligible for an "M," as well as the obligations of attendance at practice, makes it that to earn the athletic award a man will have to work as faithfully in the inter-faculty games as he would have to work to win a similar honour were the Inter-collegiate league in existence this year.

SMITH WITH ENGINEERS.

R. B. Smith, Arts '19, is Sapper in the Canadian Engineers, taking a course at Ottawa as Divisional Signaller.

TEA ROOM OPENING.

On Monday next—Oct. 23rd—the students of R. V. C. will open their tea-rooms, in aid of the Red Cross Society, in Strathcona Hall, at 4 p.m. It is hoped that the students of McGill will co-operate with them in helping to make this project a success.

COLUMBIAN CLUB SMOKER.

There will be a smoker of the Columbian Club held next Monday. The smoker will be held in the Club's rooms on Hutchison street at 8 p.m.

QUEEN'S RUSH OVER.

The medical freshmen of Queen's got their's on Wednesday afternoon, the affair beginning with a tug-of-war in which the Freshmen were badly defeated. They were then tied up, decorated with paint and paraded through the streets in corsets and lace trimmed pants.

INTERVENTION BY UNIVERSITY STOPS "SCRAP"

(Continued from Page 1.)

mores who were removing him to their headquarters. This student claimed that he had been initiated three times during the present week, and that he believed he had suffered sufficiently, also making the claim that he had been abused by the Sophomores when he had accosted a policeman on the street and had craved protection. At the same time Dr. J. A. Nicholson, the Registrar of the University, after a survey of the situation, got in touch with Mr. Common, and urged the Students' Council to take steps to have the captive Freshmen released, on the ground that the Sophomores had forced their way into private property, and that the retention of the Freshmen might prove injurious to their health. In addition the whole incident met with the extreme displeasure of the University authorities, who were determined that there should be no repetition of last year's fracas, where injury and damage to property might very easily result. Mr. Common accordingly ordered an armistice until one o'clock, and also called a special meeting of the Students' Council and of the presidents of the First and Second year classes in the Union at the same hour. A conference between Sir William Peterson, the Principal; Dr. C. E. Moyse, chairman of the committee of Morals and Discipline; Walter Vaughan, Bursar; Dr. J. A. Nicholson, secretary; Frank B. Common, president, and H. M. Morgan, vice-president, of the Students' Council, followed. Voicing the feeling of official McGill in the matter, Sir William Peterson stated that the release of the Freshmen incarcerated in the Mackay house must be effected immediately, or the University authorities would take other measures to bring this about, measures which might bring much discredit upon the University. He further stated that the practice of raids being carried out upon boarding houses and the student occupants being forced to accompany those in search of them would not be tolerated, nor could the fact that students had taken possession of University property be overlooked. This was contrary to the attitude taken by the University last year, when a fine was imposed upon students taking part in the melee, and a warning given that such an occurrence would not again be tolerated. The Principal asked that the Students' Council take the matter up and recommend that the men be released. Should this recommendation not be followed by the Second year men, the University would be compelled to bring other forces into play.

Some sixty Freshmen and Sophomores followed their presidents into the Union for the meeting called with the Students' Council at one o'clock. Frank B. Common called the attention of the students to the situation which had arisen, and presented a recommendation adopted at a meeting of the Students' Council a few minutes before, urging the release of the Freshmen. Much discussion ensued upon this. After a debate of some time, the Sophomores consented to release the men on the understanding that they be paroled. This the Freshmen presidents were unwilling to agree to, it being urged that the "scrap" take place at a set hour yesterday afternoon. Mr. Common stated that the Council could not offer to regulate the "Scrap," but could only offer its good offices in an endeavor to reach an adjustment of the situation. One thing had to be done immediately, and that was to release the Freshmen in the Mackay house. It was three o'clock before an agreement was reached in the matter, the Sophomores offering to release their captives and to withdraw from the "scrap" altogether. This met with the approval of the Freshmen representatives.

At 3.30 the Freshmen were released after their long confinement, their faces smeared with paint and their clothing in none too good shape. In spite of their predicament they seemed in the best of spirits. Mr. Common explained the situation to the men in the house, and urged them to go home without any further trouble, a recommendation which met with approval, particularly as a heavy rain was falling.

There were few, if any, lectures in the First and Second years of the University, and a strange quietness pervaded the buildings.

It is said that even though the Freshmen were released, serious consequences may follow the incident, with expulsion from the University hinted at in some cases of ringleaders.

"SING" TO BE HELD IN HALL SUNDAY

Favourite Hymns to be Sung—Commences at 8.45 Sunday Evening.

The second Sunday evening "Sing" is announced to take place this next Sunday, commencing at 8.45 p.m. Last year the "Sings" proved very popular with the student body, and if one can judge at all by the attendance of last week, everything bids fair to the continued popularity which these affairs met with.

It is the intention of the McGill Y. M. C. A. to provide a place where students of every creed may gather on Sunday evening. Strathcona Hall, with its reading room and lighted fire place, has made many a fellow cheery in the past, and the new-comer to McGill should at least pay a visit, either from loneliness or out of curiosity.

Commencing when church is over, the "Sing" has proven itself to be the best place to spend an hour before retiring.

Old favorite hymns, at the request of those present, are sung until about 9.30, when light refreshments are served. About fifteen minutes more are spent in singing, and the whole is through at 10 o'clock sharp.

PHRYNE AND FRANKENSTEIN

Dear Phryne,—I read the three letters in the "Daily" this morning, with a feeling of bewilderment. I hope that the disagreeable, stabbing letter signed "Joan" will not deter you from writing in the future. As I have said before, it does not matter whether you are a woman or a man, whether you live in the R.V.C. or in the Library (as many students are suspected of doing), or some other place. You are, at all events, sincere; and, for a foreigner (for that is what I judge you to be), you have a mastery of English that is astonishing. Therefore, Brother Phryne—Sister Phryne Comrade Phryne—Ah! that is the word!—dear Comrade, never mind what people say, but write, and keep on writing.

My answer to your interesting letter will appear some time next week. The discovery that I am not one person, but three—who knows? perhaps more!—has dazed me. I must have a little time in which to decide whether I am I or somebody else.

FRANKENSTEIN.

ESSAYS ON ARBITRATION.

The Lake Mohonk Conference on International Arbitration, offers a prize of $100 for the best essay on "International Arbitration," by an undergraduate man student of any College or University in the United States or Canada.

The donor of the prize is Chester Dewitt Pugsley, of New York City, Harvard, '09, and the judges Hon. William Howard Taft, Kent Professor of Law, Yale University; Arthur K. Kuhn, Ph.D., Lecturer in Private International Law, Columbia University; Rear Admiral Austin M. Knight, U.S.N., President Naval War College, Newport, R.I.

The contest closes on March 15, 1917, and the following are the conditions:

Each essay should show an understanding of the nature and history of international arbitration apart from and in connection with the Hague Conferences and Hague Court, and may also refer to (or, subject to the above requirement, emphasize) such subjects as the Permanent Court of Arbitration, the proposed Judicial Arbitration Court, Good Offices, Mediation and Commissions of Inquiry, as treated in the "Conventions for the Pacific Settlement of International Disputes" adopted by the first and second Hague Conference, and in the "Draft Convention Relative to the Creation of a Judicial Arbitration Court" agreed to by the second Hague Conference.

Each contestant is requested to append to his essay a list of works consulted, if possible, with specific references.

The term "undergraduate student" applies to one who, in a college or scientific school, is doing the work prescribed for the degree of bachelor, or its technical equivalent.

Essays must not exceed 5,000 words (a length of 3,000 words is suggested as desirable), and must be written, preferably in typewriting, on one side only of plain paper or ordinary letter size (8in. by 10½ in.). Manuscprits not easily legible will not be considered.

Each essay should bear a nom de plume or arbitrary sign which should be included in an accompanying letter giving the writer's real name, college, class and home address. Both letter and essay should reach H. C. Phillips, Secretary, Lake Mohonk Conference, (address, until December 1, 1916, Mohonk Lake, N.Y.; December 1, 1916, to April 1, 1917, 3531 Fourteenth Street N. W., Washington, D.C.), not later than March 15, 1917. Essays should be mailed flat (not rolled).

The award of the prize will be made at the Lake Mohonk Conference in May, 1917, to which the winner will be invited.

For additional information, references, etc., address the Secretary of the Conference.

The eighth Pugsley prize brought out forty-three essays. The prize was won by George R. Fairlamb, Jr., a sophomore in the United States Naval Academy at Annapolis, Maryland. Mr. Fairlamb's essay is published by the Lake Mohonk Conference on International Arbitration, and can be obtained on application to the Secretary. The next in order of merit were Ralph S. Underwood, of University of Minnesota, Minneapolis, Minn., second place; Charles M. Ross, of Eureka College, Eureka, Ill., and Summerfield Baldwin, 3rd, of Harvard College, Cambridge, Mass., tying for third place.

THE FIRST CONCERT BY CONSERVATORIUM

Fine Renditions Were Rule In a Varied Programme of Interest.

The annual concert given by the Faculty of the Conservatorium was held last night in the Convocation Hall of the R.V.C. Messrs. Hungerford, Notley and Brant provided the programme, ably supported by Miss Lichtenstein and Miss Agnes Harvie, who accompanied them.

Mr. Hungerford opened the concert with a Concerto in five movements by Wilhelm Friedermann Bach-Stradal. The somewhat regular style of this musician was admirably suited to Mr. Hungerford's playing. The first three movements sounded to the uninitiated ear at all events very like Bach, but the Largo movement is much more plaintive, and the Finale is livelier.

Mr. Notley then sang a series of different songs, "Canzonelta," by Salvator Rosa, an Italian song of the seventeenth century; "Thine Heart O Give Me," by Bach, "And so I made a Villanelle," by Cyril Scott. He was at his best, however, in the French song, "Aux Cahos des Bois," "Ton Sourire," and "Chant Hindou," "The Pirate Story," by Graham Peel, of which the words are taken from Robert Louis Stevenson's "Child's Garden of Verses," was also admirably rendered by Mr. Notley, as was "The Norseman's Song," a Norwegian Idyle by Frances Allister.

The brilliant Valse in E major by Mozshowski, was splendidly interpreted by Mr. Hungerford; the "Polonaise," by Chopin, seemed less suited to his style.

Mr. Brant, who played the violin, gave as his first number Tartina Pente's Concerto in D minor, in which he brought out the haunting theme all through the three movements.

He afterwards played Schubert-Wilhelmy's beautiful "Ave Maria," and ended up with a series of lively and charming "Gypsy Airs."

SAILORS PLAY McGILL TEAM ON SATURDAY

First Outside Athletic Event of College Year.

McGILL HAVE FINE TEAM.

Many Old Timers to Appear in Tomorrow's Game at Stadium.

All arrangements have been completed for the game between the McGill English Rugby team and the sailors of the H.M.S. Carnarvon, which will take place at the Stadium on Saturday afternoon, October 21st, commencing at 3 o'clock sharp. The McGill team held two good practices this week, and there was a large turnout at both practices, while the sailors, on the other hand, have had a couple of practice games, and are in the best of form. The line-up of both teams is as follows:—

McGill.	H.M.S. Carnarvon.
Full back.	
Clark	Doubleday
Three-quarters.	
Heartz	Vening
Tuohy	Clayton
Busby	Taylor
Upham	Hingston
Halves.	
Clark	Thomas
Donnelly	Gigg
Forwards.	
Patterson	Parker
Roscoe	James
Fraser	Moore
Pitts	Lasbrooke
Britton	Steers
Hunter	Ballinger
Fleck	Evans
Swancesky	Thomas
Substitutes.	
Beverly.	
MacCullock.	

Clark, who plays full-back, hails from England, is sure on his feet and is a good punter. He played on some of the best University teams in England, and also in Western Canada.

Tuohy comes from Victoria, where he has played since he was a boy. He is fast on his feet, and a sure catcher and punter. Busby and Upham are both from Vancouver, and have played on both the high school and college teams there. Both are fast runners and good tacklers. Heartz comes from Acadia University team, where he played when that team won the championship of Eastern Canada. A. Clark also comes from Victoria, where he played on the high school team, and also on the James Bay Athletic Association team. He is fast on his feet and is a sure tackler. Donnelly, his partner, comes from Dalhousie, where he played on that team the year they beat everything that came in sight. Among the forwards Patterson and Britton are the line men. Patterson, commonly known as "Slim," around the college, comes from Vancouver, and is there in the rushes. Britton comes from Halifax, where he made a name for himself as a lock man in the scrum on the champion Wanderer team of that city. Hunter, Fleck, Roscoe and Fraser are all good forwards, and played on the McGill team which won the championship of Montreal two years ago. Pitts, Swancesky and Beverly come from the Rocky Mountain region of British Columbia, and will surely give a good account of themselves on Saturday.

Captain Simpson has kindly consented to march the C.O.T.C. to the game after they fall in. It was thought at first that the sailors would be able to parade up with them, but they have a parade in the morning, and it would be asking them too much to parade again in the afternoon. However, they intend to be there about two hundred strong to help their team along to victory.

The game will be in aid of the Red Cross, and an admission of twenty-five cents will be charged to get in. The game will be good and fast, and a large turn-out is expected.

Mr. Gunn, who played in the English Rugby League two years ago, has kindly consented to referee. He is an Old Country man, and knows the game well.

The sailors are coming in from Vickers drydock on special cars leaving there about two o'clock. All fourth year students who don't go to drill are requested to turn out, and cheer the team along. All players are requested to be at the Stadium at 2.45 sharp, so that they will be able to be on the field at the correct time. Any player who has not got a complete uniform can obtain one from A. Clarke at the McGill Union, either on Friday or Saturday morning.

FOOD FOR GERMANS.

The White Star liner Baltic, which sailed from New York for Liverpool a few days ago, carried 16,000 tons of munitions, including 12 big tractors, which will be made into "tanks" by the British army.

SHIPOWNER DEAD.

The death of Sir Charles Cayzer occurred at Aberfoyle, Scotland, on September 28. Sir Charles, who was 73 years of age, was head of the prominent shipping firm of Cayzer, Irvine and Co., Ltd., owners of the Clan Line of steamships. For many years he sat in Parliament for Barrow-in-Furness, being the first Conservative elected for Barrow. His daughter, Florence Gwendoline, married Admiral Sir John Jellicoe, Commander-in-chief of the British home fleets, in 1902.

The Royal Military College of Canada.

THERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government Institution, designed primarily for the purpose of giving instructions in all branches of military science to Cadets and Officers of the Canadian Militia. In fact, it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and in addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation is considered by the authorities conducting the examination for Dominion Land Surveyor to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same exemptions as a B.A. degree.

The length of the course is three years in three terms of 9½ months each.

The total cost of the course, including board, uniform, instructional material, and all extras is about $800.

The annual competitive examination for admission to the college, takes place in May of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the secretary of the Militia Council, Ottawa, Ont., or to the Commandant, Royal Military College, Kingston, Ont.

M'S GRANTED THIS YEAR ON NEW PLAN

Set of Rules for Football was Drawn Up Yesterday Afternoon.

A special meeting of the Athletic Association was held in the Union yesterday at 5 o'clock, to discuss the report of the committee appointed to look into the awarding of M's for football this year. After some discussion the following motion was adopted:—

1—That all players, in order to qualify, must play at least 75 per cent. of all games, and attend team practices.

2—That three neutral judges not affiliated with college activities be appointed.

3—That these judges grade all players according to the ability displayed in the various games.

4—That all players wear distinctive letters or numbers to facilitate the work of the judges.

5—That each judge work independently of the other ,and send a report to the Athletic Association.

6—That the Athletic Association discuss the reports of the various judges and award "M's" accordingly.

7—That a limit of six (6) large block, and eight (8) small block "M's" be granted, but that only such a number as in the opinion of the Association have duly earned their letters, shall be awarded.

Communications from T. J. Fox and J. P. Gilhooly, applying for reinstatement, were read, but were left over to the next meeting.

The meeting then adjourned.

HOLLAND'S NAVAL CRANES.

London, England—Before the Institution of Naval Architects, M. G. de Gelder recently described the new dock cranes used by the Rotterdam Dockyard Company. The Rotterdam Dockyard Company is now turning out more tonnage than any other yard in Holland, the output last year having been nine steamers, each of 6,000 tons deadweight or over, complete with all machinery. Originally the shipyard used the ordinary derrick masts of modernized type (viz., latticework masts with electric hoisting winches on the ground level), and in addition, wire-rope switchbacks between wooden poles placed at the ends of each berth. This combination of derrick-masts and switchback was found to be very satisfactory, when account was taken of the low initial cost, but it was thought advisable to adopt a more efficient arrangement, because the size of steamers to be built was on the increase, and quick handling of material was absolutely necessary in order to arrive at a large output.

After a consideration of various arrangements, a system was designed which, said the lecturer, was a combination of the ideas embodied in the travelling tower crane and the cantilever crane. The cranes, supplied by the Haarlemsche Machinefabrick, of Haarlem, were of the all-round swinging type, and ran alongside the berths on top of lattice girders supported by columns. They could lift three tons at the extreme end of the arm, seven and a half tons with a radius of 29 feet 6 inches and intermediate weights between these limits. The hoisting speed was 20 inches per second for three tons, 13 inches for five tons, and 10 inches for a load of 76 tons. The horizontal travelling speed was 39 inches per second, and the swinging of the crane through 360 degrees required only 35 seconds. The travelling speed of the trolley on the arm was 20 inches per second.

A year's experience, continued Mr. Gelder, showed that one crane was quite sufficient to transport all the material required for the building of a 6,000-ton steamer, about 360 feet long, and that such a steamer could be launched practically ready for delivery within four months after the keel was laid. A fair opportunity of ascertaining the direct saving in wages due to the shipyard cranes was afforded by building two sister vessels of about 6,000 tons on the same berth and under exactly the same conditions, with this difference only, that the first ship was built before the cranes were fitted, and the second ship immediately after. The direct saving obtained by reducing the piecework rates of the iron-workers and laborers, amounted to 6 per cent. Apart from this direct saving there were indirect savings which were rather difficult to estimate. The cost of upkeep of wires, blocks and tackles was practically reduced to nothing. Although the piecework rates for riveting were not changed, the cost of riveting was reduced on account of the fact that the cranes allowed parts of bulkheads, girders, etc., to be riveted up hydraulically on the ground, before being lifted in place, instead of being riveted up by hand or pneumatically after erection in place. Another important factor was that the engineers could now put in place all their auxiliaries and shafting before the vessel was launched, thus obviating great delay and inconvenience in competing the vessels at the finishing berth.

Finally, there was the important saving in time of building. For the 6,000-ton vessels referred to, built under similar conditions, the time for the second ship was reduced from five to four months, which meant an increase of output of 25 per cent., and a considerable reduction of the amount of the general expenses to be charged up to each vessel, apart from the fact that the time of delivery which might be quoted often affected the contract price which might be obtained. In fact, within 18 ordinary working days after the first keelplate was laid down all the remaining keel plates, the bottom plating in way of double bottom, the entire double bottom, including centre girder, intercostal floors, margin plates, tank top plating, all the frames from collision bulkhead to after peak bulkhead, two complete side stringers, and all bulkhead wing plates, also 60 shell plates, and various strong beams, all for a 6,200-deadweight cargo steamer, had been erected in place by the use of two cranes as described above.

BRITISH SHIPPING INCREASES.

A substantial increase in English merchant shipping under construction for three months is shown by Lloyd's, which reports that on October 1 there were 469 vessels building, representing 1,789,054 tons, or about 249,000 tons more than the figures for the previous quarter, and 253,000 tons more than a year ago.

SHIPPING LOSSES.

The Journal of Commerce statistics show 3,097,097 tons of shipping destroyed since the beginning of the war, representing 1,662 ships. The average number destroyed in each of the past five months was 88 ships, of 125,738 tons. Individual tonnage was higher in September than in August. Great Britain and Norway had the greatest losses last month.

R.V.C. NOTES.

R. V. C. TENNIS.

Owing to the bad weather, the tennis tournaments at the R. V. C. have been progressing slowly. On Wednesday last, however, several matches were played off. The results in the Inter-year matches were as follows:

W. Wyatt, '17, tied with M. Muir, '18.

M. Spier, '17, was defeated by H. Davidson, '20, 6—10.

L. Fowler, '18, won from F. Grindley, '19, 11—5.

F. Maclaren, '19, won from C. Hay, '18, 11—5.

E. Ross, '20, won from E. Abbott, '19, 10—6.

In the Individual Tournament, the following are left in the second round —E. Abbott, L. Fowler, D. Hicks, M. Muir, Q. Savage, H. Davidson, H. Willard, W. Wyatt, E. Ross, E. Price.

It is urged that all further matches be played off at the first opportunity. There is a possibility of a match with Macdonald taking place to-morrow but arrangements have not yet been completed.

R. V. C. Students are asked to see the notices, in connection with the tea-room, in the Common Room.

QUEEN'S WILL FORM A KILTY BATTALION

Has the Whole of Canada as a Recruiting Area, is Announced.

Special to McGill Daily.

OTTAWA, Oct. 19.—Lieut.-General Sir Sam Hughes, Minister of Militia and Defence, has authorized the organization of a Highland battalion in connection with Queen's University, Kingston, with Major Campbell, now commandant of Fort Henry, in command, and Major R. D. Sutherland, ex-Mayor of Kingston, as second in command. The officers of the battalion will not be confined to members of the staff of the University.

For some time there has been all kinds of rumors in the air about a new battalion, and when it was announced recently that Kingston would have one company of a new base battalion, it was felt that, perhaps, after all, Kingston would not have a battalion. The Standard suggested at the very beginning of the talk for another battalion, that it be a kilties' battalion, and that the new unit, if authorized be given an unlimited recruiting area. This has been done. Queen's will have a Highland battalion, and will be given the whole of Canada as a recruiting area. From the Atlantic to the Pacific, the new battalion will be able to reach out for recruits, and from its Scotch Presbyterian graduates, will no doubt be able to secure the necessary number of men.

The names of several city and county officers are mentioned in connection with the new battalion. These will be made known later, though it is pretty certain that Major Vanluven, of the county, will be included in the list.

Organization will commence at once, but it is not yet known where the battalion will be quartered. Kingston will be the headquarters, and the city will have to get busy at once to accommodate the new unit. It is expected that one company will be raised in the city within a month.

"THE PEG printed PEG-TOP guarantees its quality"

Positively all imported tobacco.

QUALITY MAINTAINED FOR OVER 30 YEARS

PICTURES SHOWN CIVIL SOCIETY OF ENGINEERS

Mr. Paul Seurot Addresses on "Western Front"

VERDUN FIGHTING SHOWN.

Fine Description. Reel Depicts Actual Fighting of French Warriors.

Last night the members of the Canadian Society of Civil Engineers listened to a very interesting and instructive lecture given in their club rooms at 176 Mansfield street. The lecturer, Mr. Paul A. N. Seurot, M.Can. Soc. C.E., was one of the party of Canadians recently entertained by the French War Department. The Canadians were given liberal freedom to visit all sections of the Western French battlefront. They had exceptional opportunities to photograph the army in its operations, not only behind the lines, but also right up to the front line trenches.

The lecturer recited a few of the narrow escapes experienced while taking some of the scenes. On more than one occasion bombs dropped by aerial raiders missed the party by but a small distance. While near the trenches, large shells dropped all around them, providing timely studies for their photography. Considering the difficult and risky nature of the undertakings, the pictures for clearness and camera skill were truly marvels.

A very interesting reel showed a section of the Verdun fighting. Behind the lines, long lines of ammunition auto cars were seen transporting shells for the big "Jack Johnsons," followed by the famous "75" and "145" m.m. At the front slides depicting the havoc wrought by the huge 45 c.m. German guns placed 17 miles behind their lines were but a few of the many interesting ones shown.

The lecturer pointed out the innumerable churches singled out by the Germans for their artillery targets. In bold contrast to these revengeful tactics stood out the treatment of the German prisoners. Many of the French prison camps, even the captives admitted, were much more comfortable and luxurious than even their own training grounds.

Mr. Suerot closed the lecture by showing a few scenes of women workers, without whom the French would have been unable to have supplied the vast quantities of ammunition to not only their own armies, but also to those of Roumania, Serbia and Russia.

English Hose
At 50c Pair

We are fortunate in getting a large stock of fine Hosiery from England—our buyer personally visited the big London warehouses — and cleaned them out on many lines.

Morley's Black Cashmere Hose, 35c a pair, or 3 pairs for $1.

Soft Fine English Cashmere Socks, guaranteed unshrinkable, at 50c a pair.

All Pure Wool Unshrinkable Hose, in all shades, plain and fancy weaves, fast colors, at 60c a pair.

Extra Fine All Wool Socks, full fashioned, at 75c a pair.

Exceptional quality of Fine Smooth Botany Wool Hosiery at $1.

Ribbed Socks, all wool, plain and heather mixtures, 50c a pair.

Scotch Heather Wool, Ribbed Hose, 60c a pair.

Extra heavy winter weight in Fine All Wool Ribbed Socks, 85c a pair.

For men who do not like the "feel" of wool next a sensitive skin we have—

Hosiery of fine smooth Egyptian fabric at 50c a pair.

Pure, winter weight Lisle Socks, fine soft texture, at 50c a pair.

Clearing out all Boys' Jerseys, fine Scotch wool, worth up to 2.50, for $1.35—at Uptown Store only.

Big chance for the Boys.

MILITARY CROSS IS AWARDED LT. MATHEWSON

(Continued from Page 1.)

Hospital (McGill), and is serving as an interpreter. Lieut. Etienne S. Bieler, Arts '15, enlisted with the First Universities Company, with another brother, Andre, a student in architecture. Pte. Andre Bieler was wounded in the fighting on the Ypres salient in June, while Lieut. Etienne S. Bieler, who secured a transfer from the Universities company to the Canadian Artillery, was wounded not long afterwards.

Pte. P. A. Bieler was born in Lausanne, Switzerland.

Sapper E. M. Desbrisay.

H. A. Desbrisay, Med. '17, received word yesterday that his cousin, Sapper Eric Merril Desbrisay, Sci. '16 who has been missing since August 3, is now officially reported killed in action on that day. Word to this effact has been received by Sapper Desbrisay's father, M. M. Desbrisay, Vancouver, B.C. Sapper Desbrisay a short time before his death was transferred to the Royal Flying Corps as observer. He is thought to have been in the same aeroplane as Lieut. Kenneth Mathewson, Arts '17, who has been missing from the same date when he was shot down by a Fokker machine. Born at Mission City, B.C., on March 26, 1893, Sapper Desbrisay was educated at the Vancouver High School, and took two years in Arts at McGill College of British Columbia before he came to McGill. After taking his B.A. degre, he entered Science, where he was one of the foremost students of his class. In the winter of 1914-15, Sapper Desbrisay, who was at that time a member of the McGill contingent C.O.T.C., enlisted with a number of other McGill students in the Divisional Training Company at Ottawa, and after training there and in England, was sent to France, where he remained up to the time of his death. In addition to being a most capable student, Sapper Desbrisay was an all-round athlete. As an indoor athlete he was a close second in the Wicksteed competition; was captain of the McGill English Rugby team ,and played second team basket ball. He was also assistant secretary of the Western Club, and a member of the Business Board of the 1916 Annual.

INTEREST WILL CENTRE ON THE ALL ROUND RACE.

(Continued from Page 1.)

than any other man at present studying at McGill, and his time in the two-twenty is exceptionally good. "Bill" Gerrie has won fame as the man who ran second to Clarke, of Toronto, in his record-breaking three mile stunt at the M. A. A. A. Grounds two years ago. Bill came in a scant yard behind the Toronto star, and would have out-gamed him if the race had been fifty yards longer. Bill should be good for the three mile unless there is some unforeseen talent in that department. Bill is entered in the mile also, but has had very little experience on that short distance. Bulger, the former Michigan track man, is pretty much of a puzzle. He seems to have all the marks of a good sprinter, but it is hard to say what he will be able to do when he runs against a man of the class of Hillier or Smelzer. Donnelly, the Freshman-Sophomore sports champion of last week, expects to cut a figure to-day in the jumps, and the hurdles. The hurdles seem to be an open event to-day with the absence of Eric Pope, who was easily winner last year. Don Beach, of the second year, is perhaps the only dangerous man from that aggregation, but is hardly in the class of Sutherland, Cushing and Smelzer.

As elsewhere announced in this issue of the Daily, there is no "Rush" scheduled for to-day, so that the meet should start promptly on time, undelayed by any prolongation of the scrap. The programme of events and the numbers of the competitors are printed on the last page of this issue, and is designed to be used as a field programme in the absence of the more elaborate ones of former years. KEEP YOUR DAILY FOR THIS AFTERNOON.

CROSS TO FRANCE.

A London despatch says that Lieut. T. S. Allan, Arts '17, who went overseas with a Calgary unit during the summer, has crossed to France. Lieut. C. G. Greenshields, past student, has also crossed the Channel. Lieut. Greenshields served at the outbreak of the war with the Foreign Legion of the French Army, and has been twice wounded while holding a commission in the 24th Battalion, C.E.F.

RY. STUDENTS INSPECT THE ANGUS SHOPS

Make Trip to Study Material Handling System.

WOMEN ARE GOOD WORKERS

Many Have Been Employed Since War and Have Proved Efficient.

The annual general inspection of the Angus Shops by the students of Railway Transportation was held on Monday under the direction of Professor Keay, head of that department. This annual trip is made in connection with the course in Railroad Mechanical Engineering, taken as one of the subjects of the fourth year. The objects of the trips are two-fold; first, to follow out the method of progression used in the manufacture of railroad requisites of various kinds, and the systems and appliances used to minimize handling of materials in passing from one process to another in the course of their manufacture and delivery to the stores department or the loading track. The second object is to view some of the more interesting and unique processes, the most fascinating is undoubtedly the grey iron foundry where the car wheels are made. The car wheel foundry at Angus is probably the finest and best equipped in Canada, and hence was of more than usual interest. Car wheels when cast, are cooled very slowly in order to eliminate weakness, which would result from uneven cooling stresses if the metal were to be cooled rapidly. The newly cast wheels are carried directly from the moulds and deposited in deep brick lined pits, which are entirely surrounded by sand and are covered up after the pit is filled with wheels. The wheels are left in there for several days, and cool extremely slowly, sometimes still being very hot to the touch when removed. The slow cooling anneals the wheel to some extent, but the absence of weakening stresses more than offets that undesirable feature. The rim of the wheel is chilled in casting, but the heat from the main body of the casting soon anneals that. The only advantage of this quick chill is that the iron of the rim takes on a much closer and finer texture and hence wears better in service. The shop offered a good example of economy of operation, there being no backward movements in the whole operation from cupola to cooling pits. The steel car shops offer an interesting study. There the whole car is made up from the strips of steel plate to the completed product. The plate punching machines and the method used for spotting the punches proved of interest, but the lack of new car work made any study of handling economy impossible, as parts of the shop were not in operation at all. This was the case in most of the other shops also, so that a great part of the time was spent in watching the machinery.

Probably the most interesting feature of the trip was the way in which the use of women in some parts of the plant has supplemented the use of men, and their superiority in these cases as to quality of work turned out. Several women painters are being employed in painting passenger cars, and have proved very adaptable in this work. This may no doubt be due to a woman's natural aptitude and experience in this line. There are a number of women being used in the car upholstery department, and results show that they are fully as satisfactory here as are men.

Mr. Liddy, the president of the Railway Club, was particularly interested in this phase of the labor problem, and had some unique remarks on the subject, even attempting to gain an interview with some of the fair sex laborers. Further trips are to be made throughout the session.

WHAT'S ON

To-day.

2.30 p.m.—University Sports.

To-morrow.

2 p.m.—Football, McGill vs. H.M.S. Carnarvon, Stadium.

10 a.m.—Arts Football Practice.

8.15 p.m.—Ry. Graduate Club, Union.

Coming.

Oct. 22—"Sing" at Strathcona Hall at 8.45 p.m.

Oct. 23.—Columbian Club Smoker.

Oct. 23—Students' Orchestra practice in Strathcona Hall.

Oct. 23—R. V. C. Tea-room opens, Strathcona Hall.

Men Wanted for the Navy

The Royal Naval Canadian Volunteer Reserve, wants men for immediate service Overseas, in the Imperial Royal Navy

Candidates must be sons of natural born British subjects and be from 18 to 38 years of age.

PAY $1.10 per day and upwards. Free Kit. Separation allowance, $20.00 monthly.

Apply to the nearest Naval Recruiting Station or to the Department of the Naval Service, OTTAWA.

Apply to LT. H. S. MATHEWS, N.R.C.V.R., 129 Commissioner St., Montreal

HARRY VOSBERG

Maker of Civil and Military Clothes
Up. 6239 — 153 PEEL STREET, Cor. St. Catherine

PROVINCE OF QUEBEC

DEPARTMENT OF COLONIZATION, MINES AND FISHERIES.

The chief minerals of the Province of Quebec are Asbestos, Chromite, Copper, Iron, Gold, Molybdenite, Phosphate, Mica, Graphite, Ornamental and Building Stone, Clays, Etc.

The Mining Law gives absolute security of Title and is very favourable to the Prospector.

MINERS' CERTIFICATES.

First of all, obtain a miner's certificate, from the Department in Quebec or from the nearest agent. The price of this certificate is $10.00, and it is valid until the first of January following. This certificate gives the right to prospect on public lands and on private lands, on which the mineral rights belong to the Crown.

The holder of the certificate may stake mining claims to the extent of 200 acres.

WORKING CONDITIONS.

During the first six months following the staking of the claim, work on it must be performed to the extent of at least twenty-five days of eight hours.

SIX MONTHS AFTER STAKING.

At the expiration of six months from the date of the staking, the prospector, to retain his rights, must take out a mining license.

MINING LICENSE.

The mining license may cover 40 to 200 acres in unsurveyed territory. The price of this license is Fifty Cents an acre per year, and a fee of $10.00 on issue. It is valid for one year, and is renewable on the same terms, on producing an affidavit that during the year work has been performed to the extent of at least twenty-five days' labor on each forty acres.

MINING CONCESSION.

Notwithstanding the above, a mining concession may be acquired at any time at the rate of $5.00 an acre for SUPERIOR METALS, and $3.00 an acre for INFERIOR MINERALS.

The attention of prospectors is specially called to the territory in the North-Western part of the Province of Quebec, north of the height of land, where important mineralized belts are known to exist.

PROVINCIAL LABORATORY.

Special arrangements have been made with the POLYTECHNIC SCHOOL of LAVAL UNIVERSITY, 228 ST. DENIS STREET, MONTREAL, for the analysis of minerals at very reduced rates for the benefit of miners and prospectors in the Province of Quebec. The well equipped laboratories of this institution and its trained chemists ensure results of undoubted integrity and reliability.

The Bureau of Mines at Quebec will give all the information desired in connection with the mines and mineral resources of the Province, on application addressed to

HONORE MERCIER,
Minister of Colonization, Mines and Fisheries, Quebec.

ARTS FOOTBALL PRACTICE.

A practice will be held on Saturday morning, October 21st, at 10 o'clock. Everyone interested in football should turn out in uniform. At this practice a captain for the team will be chosen (elected), from amongst those who turned out. As the first game is scheduled for Monday, October 23, there should be a large turn out.

LIFE ASSURANCE COURSE.

There is a possibility of a lectureship in Life Assurance being endowed at Queen's University by the Assurance Companies of Canada. J. Burtt Morgan, manager of The Life Underwriters' Association of Canada, visited the University authorities yesterday with regard to the establishment of such a lectureship.
